EXPERIENCE

JUNIOR PROGRAMMER

Canadian Viewpoint   June 2022 - July 2023

- Programmed and thoroughly tested surveys using Python and XML, adhering to client specifications for high-quality and standards-compliant deliverables.
- Performed thorough code reviews identifying and addressing potential issues to improve accuracy and reliability of survey implementations.
- Proficiently used HTML, CSS, and JavaScript to configure and style questions, improving respondent interactions and overall survey usability.
- Collaborated closely with team members to ensure seamless integration of survey programming and testing processes.
- Demonstrated attention to detail during the review of client surveys, identifying potential issues and suggesting improvements.
- Effectively communicated with clients to understand their survey requirements and translate them into well-structured survey programming.

BREAD BAKER/FRYER

Stone Crock Bakery   May 2017 - Dec 2020

- Collaborated effectively within a team and independently to ensure timely fulfillment of client orders and product preparation.
- Assumed leadership responsibilities for a team of 2-3 staff members in the absence of the supervisor.
- Executed repetitive tasks with exceptional attention to detail, maintaining consistent quality standards.

PROJECTS

VIDEO GAME STORE WEBSITE

- Created a dynamic website using C#, ASP.NET MVC, and Microsoft SQL technologies.
- Implemented features for both employees and customers, allowing for user logins, game purchases, game ratings and reviews.
- Developed a comprehensive database from scratch to support the website's functionalities.
- Enabled seamless addition of new games and events by employees, enhancing its interactivity and content.

BAKING CONVERSION MOBILE APP

- Developed a mobile application using HTML, CSS, JavaScript, and jQuery.
- Designed to convert baking ingredients between cups and grams, providing users with a versatile and user-friendly tool.
- Enabled users to personalize their experience by adding, editing, and deleting their own ingredients.
